Forecast for Tuesday 30 Nov 2021

Weather: Overcast through the day with a continued chance of rain or drizzle. A few drier spells more likely around the eastern side of the Brecon Beacons. During the evening a heavier band of rain will cross the area with a few hours of very wet and windy conditions.

Chance of cloud free mountain/hill tops above 600m: 20%, widespread low cloud throughout the day associated with rain and drizzle and then heavier persistent rain in the evening.

Visibility: Visibility will be poor or very poor for most of the day with the combination of overcast low cloud and rain. Perhaps a few brighter periods might break through around eastern areas. Cloud bases in the west will be overcast from 300m, perhaps broken 400-500m in the east.

300	8/4	8/5	9/6	8/5	8/5	9/5	8/5
Valley	8/5	9/6	9/7	9/6	9/6	9/6	9/6
Freezing Level*	2400m	2500m	2300m	2100m	1800m	1900m	1500m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Gale force gusts higher on the hills, especially later in the day, will make walking conditions difficult at times. Milder air at first but feeling cold again later in the day as freezing level falls again.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
03:00 on Tue 30 Nov 2021	0.8mm	1.6mm	1.8mm

Forecast for Wednesday 01 Dec 2021

Weather: A blustery day with some bright spells but frequent showers. Showers turning increasingly wintry to lower levels in the north later. Feeling very cold throughout with a significant wind chill.

Maximum wind: Northwesterly 35mph with gusts 45mph at times.

Chance of cloud free mountain/hill tops above 600m: 60%, periods of lower cloud are likely associated with showers through the day.

Visibility: Outside of showers visibility will be very good but it will turn poor in showers as they turn increasingly wintry during the afternoon. Cloud bases will become broken from 500m in heavier showers.

Temperature: **Valleys:** Plus 9 Celsius falling to 6 Celsius later.
At 600m: Plus 4 falling to 0 Celsius later.
Freezing level: 1000m falling to 500m.
